

Sixth Form Results Day 2018

70 students took A-level and/or Applied General qualifications this year.

We are currently awaiting results for Music A-Level which means that our statistics are estimated calculations and I am unable to provide an overall pass rate. OCR revealed yesterday that they had failed to mark part of the students' work and are trying to do this 'as quickly as possible'. This is very poor as students' university places are at stake.

I would like to congratulate all of our students who are so deserving of this excellent set of results and I wish them the very best in the future. The percentage of students achieving the higher grades of A*-C has increased from last year to 64% which is testament to the hard work of the students and the skills of their teachers.

Notable successes at A-level came from Tierney Mizell who achieved A in Media Studies, B in English Literature, B in History and a Distinction in Photography; Sophie Jarman who achieved A in Sociology, B in English Literature, B in History and C in Psychology; Connor Carter who achieved A in Maths, B in Further Maths, B in Physics and C in Computer Science, Jordan Roffe who achieved A in Maths, B in Biology and C in Chemistry.

Of those studying Applied General qualifications, Maryna Zamichowska achieved a Distinction star/ Distinction in Double Health and Social Care and a Distinction in Business Studies. She aims to study to become a Mental Health Nurse at Anglia Ruskin University.

Every student's achievements are to be celebrated but for some their results also reflect a remarkable ability to overcome adversity. Emily Dobbin, aged 19, whose father Simon was the victim of a terrible attack which left him with life changing injuries, has completed her Sixth Form courses with a Distinction star/Distinction

in Double Health and Social Care and a merit in Applied Science. During her final year in the Sixth Form Emily's family were filmed for the TV series DIY SOS when the community came together to refurbish the family's home in Mildenhall, making it suitable for the long term care that Simon needs. Emily who has been caring for her father now aims to study Paramedic Science at St George's University, London.

Hannah Bokor, aged 18, overcame health issues to achieve a B in English Literature, C in History and D in Biology. She intends to study History at university.

These students like many others have shown remarkable courage and perseverance and their results are a credit to them.

Mrs S Byles,
Principal
Mildenhall College Academy
