How last year's allocation made a difference to the outcomes of the pupils?

To measure the impact of the additional funding received, all ATT academies use GL Assessments to benchmark, measure and analyse the progress made by each pupil. GL Assessments provide nationally recognised Standardised Age Scores which can be used to robustly analyse if progress has been made. Standardised Age Scores show that a pupil is working at age related expectation if the score is 100 or more (2016 onwards)/level 4b prior to this.

By the end of the academic year, there were only 32 students in English and 13 students in Maths who were identified as not working at ARE of 100, based on the summer term GL assessments.

The term by term impact of our English and Maths interventions can be summarised in the tables on the following pages.
